

Title: Project Finance Associate
Department: Finance, Accounting, and HR

An exciting opportunity working for a growth-oriented solar IPP as a Project Finance Associate. Leveraging your solar energy and finance background, you will be responsible to support financial analysis, origination and diligence of solar and storage project opportunities.

Company Background:

Navisun is a solar independent power producer that focuses on acquiring, co-developing, constructing, financing, owning, and operating distributed generation and small utility-scale solar and battery storage projects in the United States. The company is owned by OMERS Infrastructure, a preeminent global infrastructure investor and investment arm of OMERS, one of Canada's largest defined benefit pension plans with C\$121 billion in net assets (as of December 31, 2021).

Position:

Finance Associate, Full-time

Location:

Lower Fairfield County, CT

Responsibilities:

- Review and analyze new solar project and battery storage development and acquisition opportunities, including the review of data rooms/project documents/financing documents
- Assist in diligence and closing process for tax equity and debt financings
- Coordinate with the asset manager to prepare and update project operating budgets and other required deliverables to financing counterparties
- Construct project-specific pro forma financial models in order to assess economic profile; assist in drafting investment committee memos and monthly reports as needed
- Update and maintain the company's corporate financial model and provide necessary reporting and model assumptions to investors as needed
- Develop understanding of key determinants of and anticipated trends in energy and REC pricing in various markets

Qualifications:

- Bachelor's Degree in engineering, finance, or similar quantitative field from a top school; MBA a plus
- Passionate about working in the solar industry
- Ability to multi-task, prioritize and work efficiently and independently in an entrepreneurial work environment where all employees wear multiple hats
- Strong work ethic
- 3-5 years of renewable energy experience (specifically solar) at a developer, bank or private equity firm
- Strong understanding of tax equity and project financing
- Full understanding of Microsoft Office suite, especially Excel; ability to run complex financial proforma models, both project and corporate level
- Outstanding communications skills, both oral and written
